

Merieme LAIB

Looking for a Data Science Internship

Master's student in Data Science at Université Claude Bernard Lyon 1, I am looking for a 5 to 6-month M2 internship starting in February 2027 in Data Science, AI, Machine Learning or NLP. My experience mainly focuses on information extraction using LLMs, dataset preparation, model evaluation and knowledge graph modeling. I would like to contribute to real-world data projects in an international environment, ideally in Japan.

Languages

French
Fluent

Arabic
Fluent

English
Advanced / C1

Japanese
A1

Technical Skills

AI / NLP
machine learning, LLMs,
information extraction,
Knowledge Graphs, dataset
preparation, model
evaluation

Database
PostgreSQL, Neo4j, Cypher

Programming
Python, C++, Java, SQL,
JavaScript

Data Science
pandas, NumPy, Jupyter
Notebook, exploratory data
analysis, data visualization,
preprocessing

Tools
Git, GitHub, GitLab CI/CD,
Docker, Google Colab, Excel

Education

Master's Degree in Data Science

Since 2025

Université Claude Bernard Lyon 1, Lyon, France

- Specialization in machine learning, deep learning, Big Data and data analysis. Applied Python projects: statistics, data mining, data visualization and complex data processing.

Bachelor's Degree in Computer Science

From 2022 to 2025

Université Claude Bernard Lyon 1, Lyon, France

Professional experience

Data Science / NLP Intern — Triplet Extraction with LLMs

LIRIS, Lyon 1, Lyon, France

From Apr. 2025 to July 2025 (3 months)

- Developed an NLP pipeline to extract structured triplets and 5-tuples from texts.
- Compared language models, including Mistral, Qwen and Gemma, based on the quality and structure of generated outputs.
- Prepared and improved a training dataset in order to reduce unstructured outputs.
- Worked on information extraction, LLMs and knowledge structuring.
- Technologies: Python, Google Colab, LLMs, NLP, data processing.

Sushiwoman — Student Job

From 2022 to 2024 (2 years)

Sushi Shop, Lyon, France

Prepared customer orders while following hygiene and quality standards. Worked as part of a team in a fast-paced environment. Trained new employees on internal processes.

Data & Development Projects

Knowledge Graph for French Language Learning — Python, Neo4j

- Designed a knowledge graph to model the errors and difficulties of Russian-speaking learners of French.
- Modeled relationships between errors, language skills and linguistic differences between languages.
- Generated synthetic data and created Cypher queries for educational progress tracking.

E-commerce Sales Analysis — Python, Jupyter Notebook

- Cleaned and explored an e-commerce sales dataset.
- Analyzed revenue, best-selling products, time-based trends and customer behavior.
- Created visualizations to identify peak periods and the most successful product categories.

Tech Event Management Platform — Vue.js, TypeScript, Java, Spring Boot, PostgreSQL, Docker

- Developed a full-stack application as part of a team using Docker, PostgreSQL, GitLab CI/CD and Sonar.
